Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowance:

Claims 1-3, 5-10, and 12-21 are allowable over the prior art of record because none of the prior art whether taken singularly or in combination to teach the clamed combination as recited, particularly require a method and an apparatus in combination with other limitations of the claim, the combination of "irradiating said surface with radiation including said wavelength ν , and measuring reflectance ρ from said surface at said wavelength ν and said polarizations p1 and p2 to thereby determine the reflectance-derived ration 1- ϵ_{p1} (ν)/ 1- ϵ_{p2} (ν); and applying said reflectance-derived ratio as said at least one additional constraint in said step (c) for computing said at least one emission value.

The closest references of Tanaka et al (US 4,881,823) and Duncan et al (US 5,501,637) either taken singularly or in combination does not teach the claimed combination as recited. Please see the previous office action and applicants' response filed on 12/7/2001 to support for reason for allowance as set forth above.
